Example of a simple HTML page

Hypertext Markup Language (HTML) is the most common language used to create documents on the World Wide Web. HTML uses hundreds of different tags to define a layout for web pages. Most tags require an opening `<tag>` and a closing `</tag>`.

Example: ``On a webpage, this sentence would be in bold print.``

Below is an example of a very simple page:

This is the code used to make the page:

```
<HTML>
```

```
<HEAD>
```

```
<TITLE>Your Title Here</TITLE>
```

```
</HEAD>
```

```
<BODY BGCOLOR="FFFFFF">
```

<CENTER> </CENTER>

<HR>

Link Name

is a link to another nifty site

<H1>This is a Header</H1>

<H2>This is a Medium Header</H2>

Send me mail at

support@yourcompany.com.

<P> This is a new paragraph!

<P> This is a new paragraph!

 <I>This is a new sentence without a paragraph break, in
bold italics.</I>

<HR>

</BODY>

</HTML>
